Oscar 2

24-Hour ABPM

24– Hour Ambulatory Blood Pressure Monitoring System.

The Oscar 2 sets the standard in 24-hour ambulatory blood pressure monitoring by utilizing proprietary motion-tolerant technology, optimizing patient comfort, giving clinicians practical interpretive analysis and incorporating the latest monitoring advances. This system comes standard with both the patented OrbitTM ABPM cuff and interpretive software AccuWinTM Pro 4 and NOW features options for central blood pressure measurement and Bluetooth-connected True24 patient diary mobile app.

- Optional Features -

- ♦ **SphygmoCor Inside:** **SunTech Medical has partnered with AtCor Medical, the Gold Standard in non-invasive measurement of central BP and arterial stiffness, to bring you the first and only ABP Monitor with SphygmoCor inside. The Oscar 2 ABPM system delivers a patient-focused solution with unmet comfort, data reliability and confidence.**

- ♦ **Bluetooth with True24:** **The True24 patient diary mobile app* is designed to pair exclusively with the Oscar 2 ABPM device with optional Bluetooth. This easy-to-use app provides a tutorial on ambulatory blood pressure monitoring and prompts the patient to enter information about their activity, posture or symptoms experienced after a BP measurement is taken. This diary information is extremely valuable, further assisting clinicians with interpreting the ambulatory blood pressure study data and making hypertension treatment decisions.**
